stubs

defensive  
protection  
"housing"

S4 1/2 - "like" structure designed to shield some parts, inside  
against actual physical interference or action, but  
primarily shielded against observation.

S4 1/2 building + contents only part of larger  
project - interfere w/ other elements.

AS BK

Big

~~Secret~~

S4 1/2 "Smoking" inside the building is meant to  
"hide out" and <sup>provides</sup> effects to its "owners" specifications  
at considerable distances. Almost as if it  
doesn't stay in the structure but moves out  
beyond it in some way.

one would expect to find them outside, not inside another

Interim

Site involves many, many diverse structures, most only marginally relevant to primary import of the site. One structure seems to have been detected of immense size + volume, the primary purpose which will culminate not long after the elapse of one <sup>year</sup> from present time. Structure seems to be intended somewhat as physical protection for its contents, but primarily as shield against observation. Something inside bldg. is intended to "reach out" beyond confines of the bldg + even the facility as a whole to perform tasks or purpose according to its "owners" specifications. Great distances remained from site in question, ("Almost as if it doesn't stay in structure, but moves out beyond it somehow"). Structures' body may have a marked rounded component to it. Numerous disk-type antennas are associated w/ the site. Cylindrical dimension are involved with important objects at site. Within a (perhaps "the") structure is huge open vertical + horizontal space. Inside as well is/are structures of bifurcating dimensions - are would expect to find a structure of this size outside, rather than within another structure. Inner structure is very complex in construction, w/ ~~many~~ many crisscrossing elements, cables, etc., + is made primarily of metal. Whole project seems to be built along space-program scales + portables of many similar elements - including machinery, equipment, techniques, technology, +
